

PRODUCT INFORMATION SHEET

AQUA-BRITE GFX1500-WP

WATER BASED GRAVURE/FLEXO ALUMINIUM PIGMENT

Aqua-Brite GFX1500-WP is a fine, bright, VOC free, silver dollar pigment granule developed for water based Liquid ink applications. Aqua-Brite GFX 1500-WP is chemically stabilized to prevent gassing reactions in water. Metaflake's unique water milling process guarantees extremely low taint & odour properties.

TECHNICAL DATA*

| | |
|--------------------------------------|---------------|
| Physical form | Granule |
| Carrier type | Wetting agent |
| Pigment Content (%) | 88 |
| Average Particle Size (microns D.50) | 15 |
| Shelf Life | 12 months |

PROCESSING INFORMATION

Aqua-Brite GFX1500-WP is broadly compatible with most aqueous ink systems with or without additions of co-solvent. A pH range between 7.5 - 8.5 is suggested for optimum stability. The granules should first be soaked in an equal volume of water or co-solvent for 1-2 hours before adding water based medium. Dispersion with minimal shear to avoid damaging the pigment is recommended.

*The typical values given in this Product Information Sheet are given in good faith for guidance only and are not guaranteed. It is recommended that customers conduct testing in their individual applications to establish suitability for any given purpose.
