

PRODUCT INFORMATION SHEET

META-BRITE SD3214-P

ALUMINIUM PIGMENT GRANULE FOR SOLVENT COATINGS

Meta-Brite SD3214-P is a medium coarse, bright, silver dollar pigment in dry granule form for Coatings applications. The solvent free delivery form provides easy handling and shipping as non-hazardous goods (NON DG).

TECHNICAL DATA*

Physical form	Granule
Carrier	Aldehyde resin
Pigment Content (%)	80
Average Particle Size (microns D.50)	38
Shelf Life	12 months

PROCESSING INFORMATION

Meta-Brite SD3214-P is broadly compatible with most solvent based systems. Aliphatic Hydrocarbons may need to be blended with 10-20% Aromatics or other strong solvent. The granules should first be soaked in an equal volume of solvent for 1-2 hours before adding binder. Low shear mixing is sufficient to achieve full dispersion and will avoid damage to the aluminium flakes.

*The typical values given in this Product Information Sheet are given in good faith for guidance only and are not guaranteed. It is recommended that customers conduct testing in their individual applications to establish suitability for any given purpose.
